SAFA Database Release 2.2.0.0 & Statistics

Jeroen JANSEN
SAFA Coordination Officer
25 October 2012

Your safety is our mission.
easa.europa.eu

Centralised SAFA database

- SAFA ramp inspections allow for a continuous monitoring of operators
- SAFA Database is the tool for the information exchange and analysis
- A new version of the Database is live since 21 September 2011

Centralised SAFA database

Used for Exchange of information

- Web based application
- Storage of Ramp Inspection Reports
- Full access for each Participating State
 - inclusion of reports
 - retrieve data
- Exchange of information
- Stored information is confidential
- EASA does not own the data!

Access to non-SAFA NAAs and to operators

- Access granted to Guest NAAs and to operators:
 - registered Guest NAAs have access limited to the reports of the operators for which they have regulatory oversight responsibilities
 - operators' access is limited to their own reports
 - Non-SAFA operators access can be obtained via the relevant Guest NAA in 2 steps:
 - The Guest NAA will give a first approval to the operator user
 - SAFA administrator will approve the access

Access to non-SAFA NAAs and to operators

- Guest NAAs and operators are able to:
 - retrieve their relevant reports
 - add information on follow-up actions taken
- **An operator will be able to register only if there is a registered coordinator for its responsible NAA**
- **Therefore, if its country has not yet registered for SAFA, the operator will not be able to obtain access**

Self registration

- How to register?
- Go to <https://safa.easa.europa.eu/user/selfregister>

Self Registration

| Operator | ▼ |
| Micronesia (Federated States) (PT) | ▼ |
| Organisation | ▼ |
| Frozen Operator (000) | ▼ |

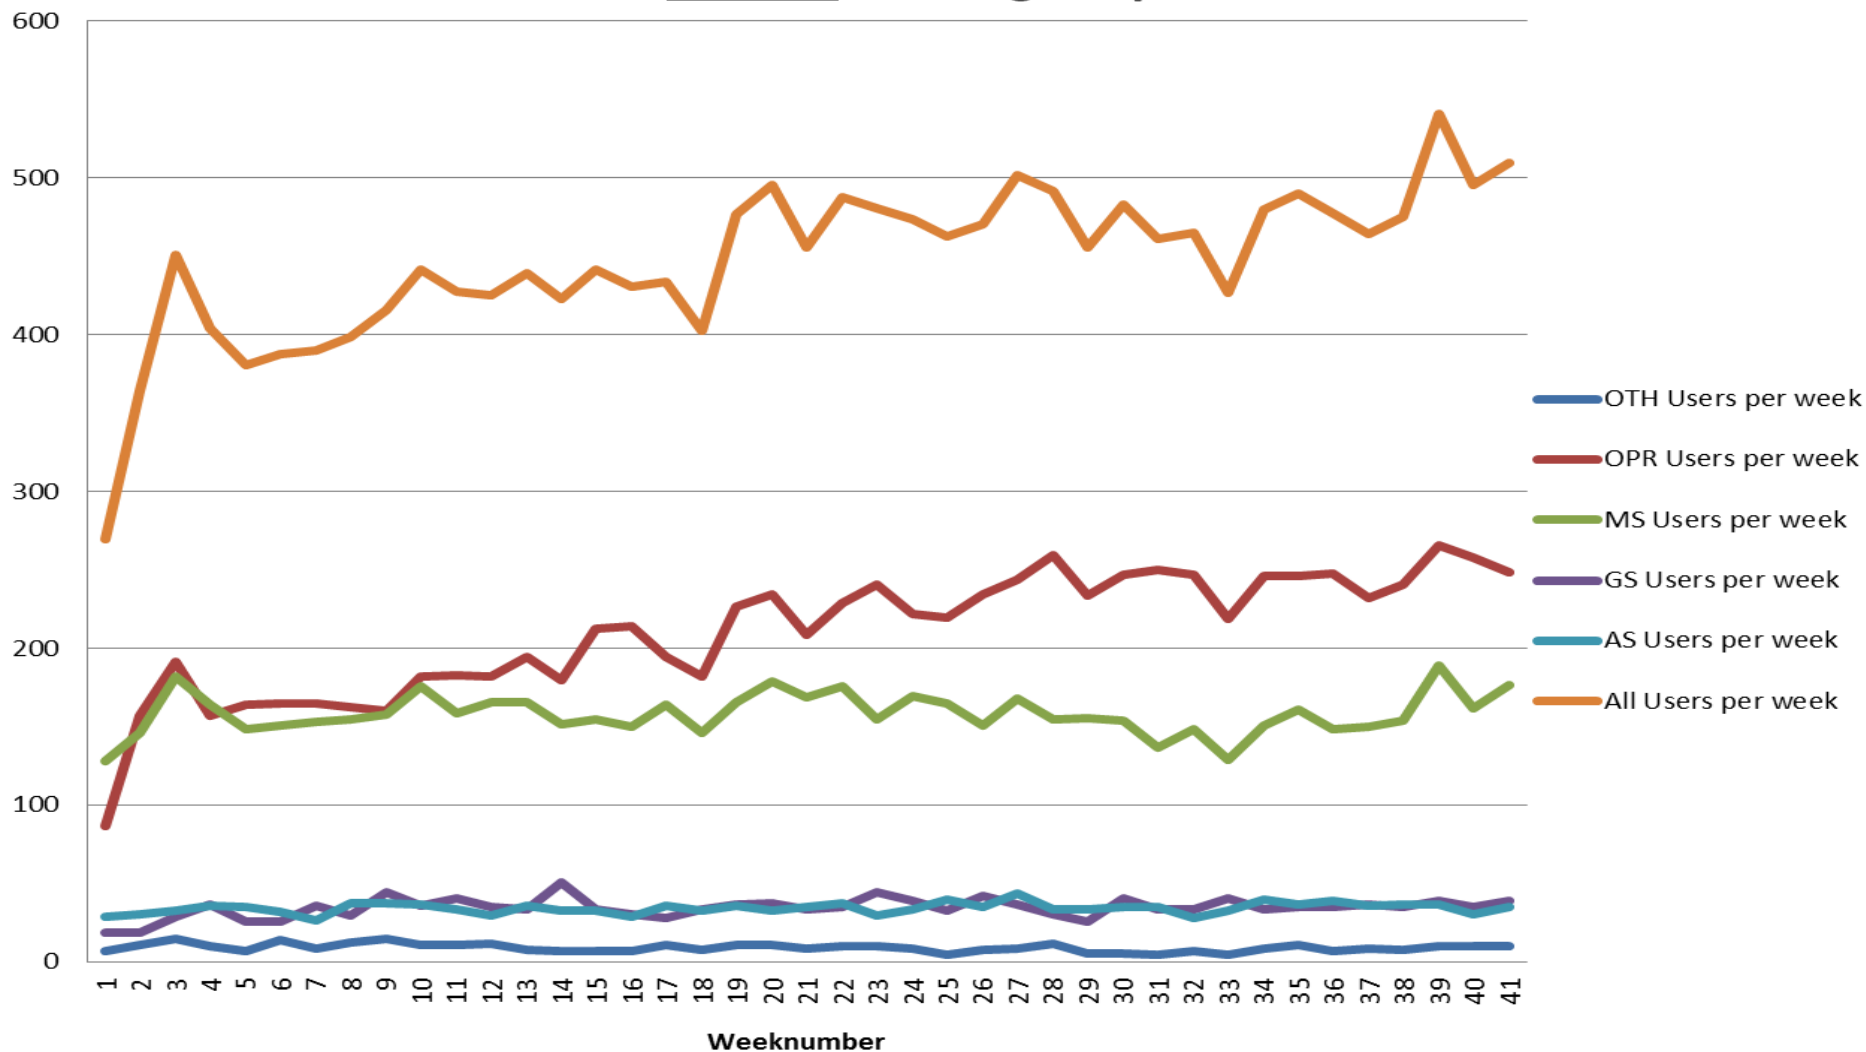

Database users

- Total number of approved users: **1980**
- Member State NAA users: **513**
- Associated State NAA users: **91**
- Candidate State NAA users: **3**
- Guest State NAA users: **311**
- EASA/ICAO/EC users: **70**
- Operator users: **992**
- Nr of operators: **676**
- Reports on registered OPR: **80%**

Database usage

Nr of distinct user logons per week

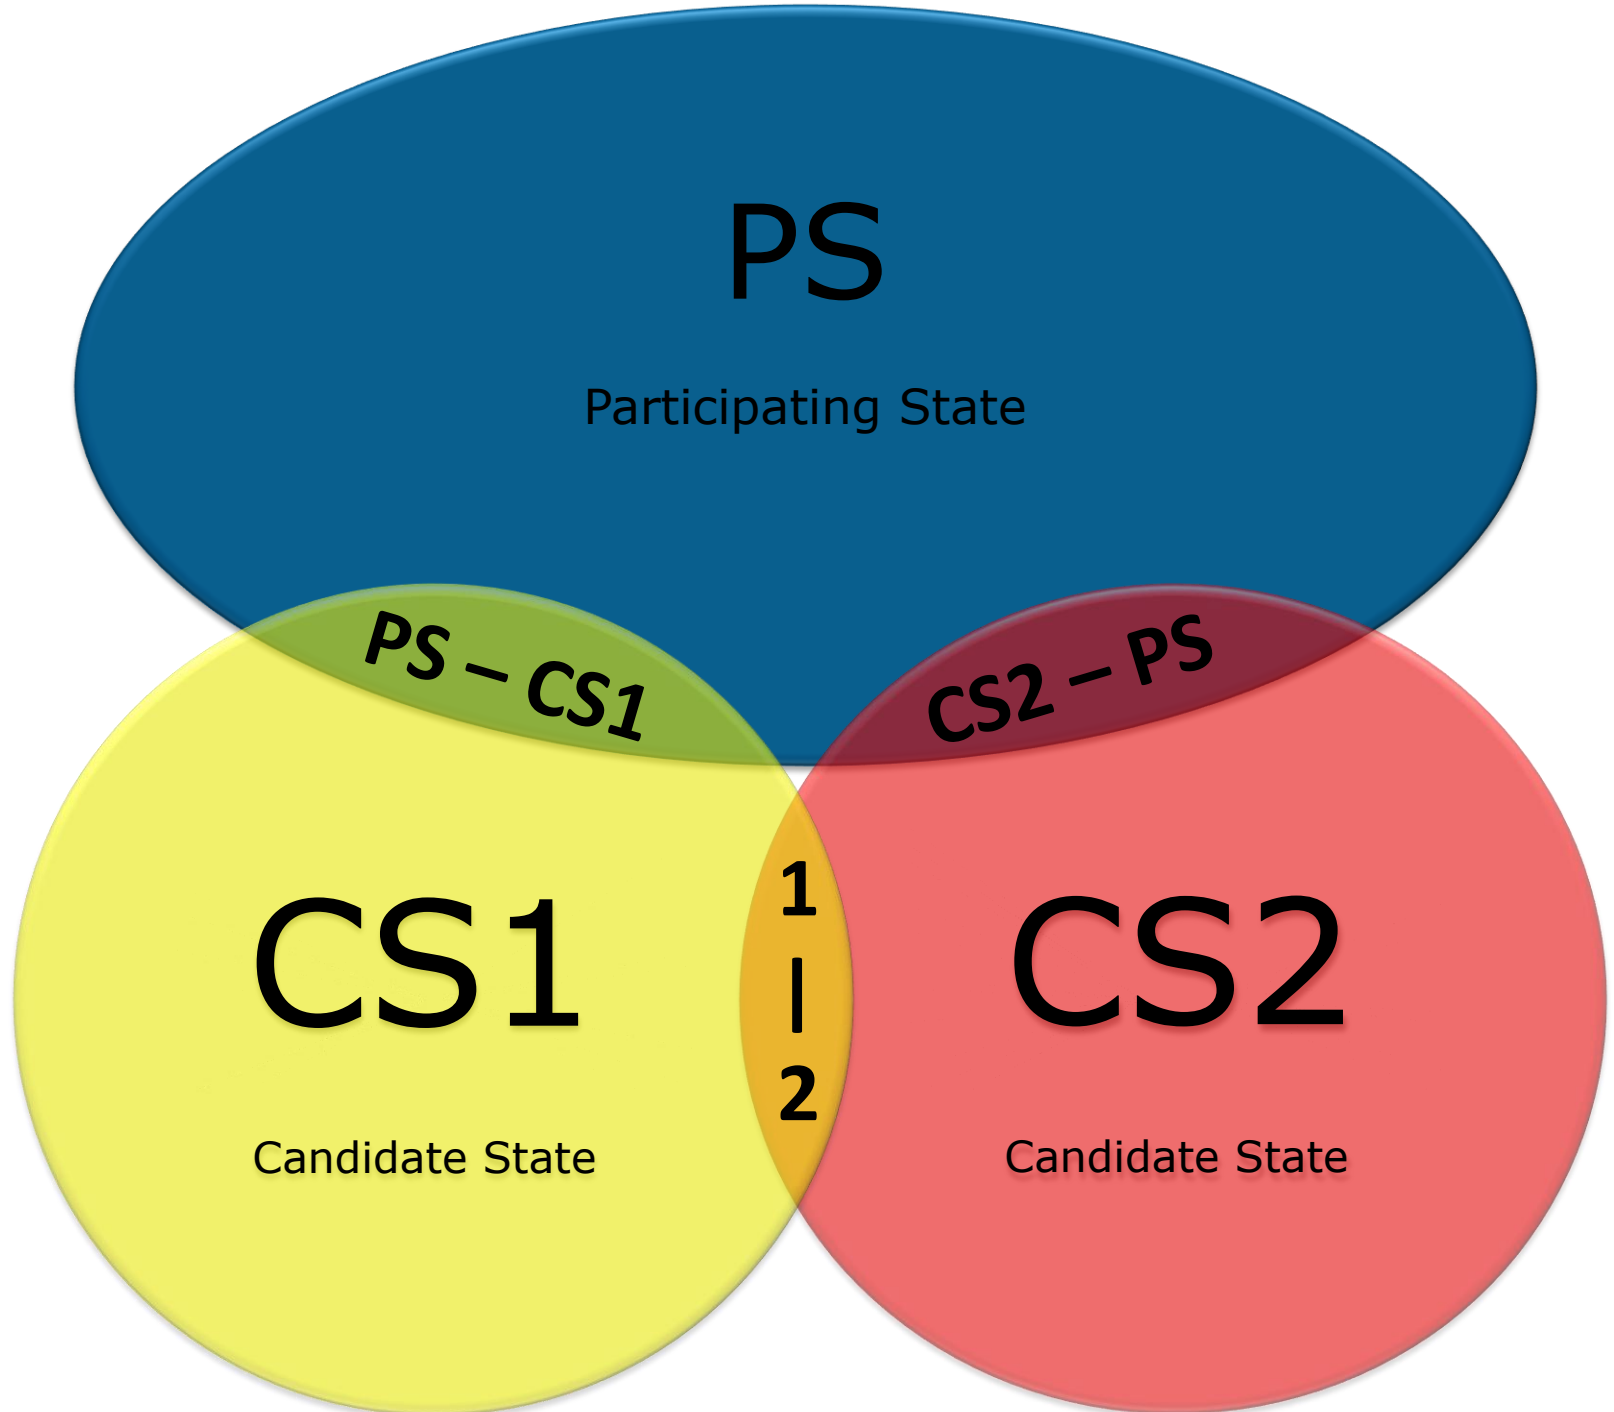

Database content

- Standard reports: **216**
- SANA Reports: **900**
- SAFA Reports: **99.232**

Data seggregation

- 2 new Candidate States (CS)
- CS should make use of the Database
- Reports & Notifications indicate CS status
- CS data not taken into account for analysis and reports
- PS and CS cannot see each others data, unless mutual interest

Information tab on Login

- Need to publish FAQs
- Administered by SAFA Coordination
- Selected items of SAFA Library are made public

Oversight inspectors

- Requested by several States
- Access for inspectors assigned to oversee national carrier(s)
- Access limited to assigned carriers
- Will not see other SAFA data
- Can be RO or RW (for follow-up)
- Directly informed on new inspections
- Introduces read/write users for guest states

Automatic disabling V2.0

- Email receipt is of paramount importance
- Also indicator that user left organisation
- Previous system disabled accounts only after 30 days inactivity
- Email sent at disabling date often lost
- Enabling by coordinator only worked if user subsequently logged on before 4PM/4AM

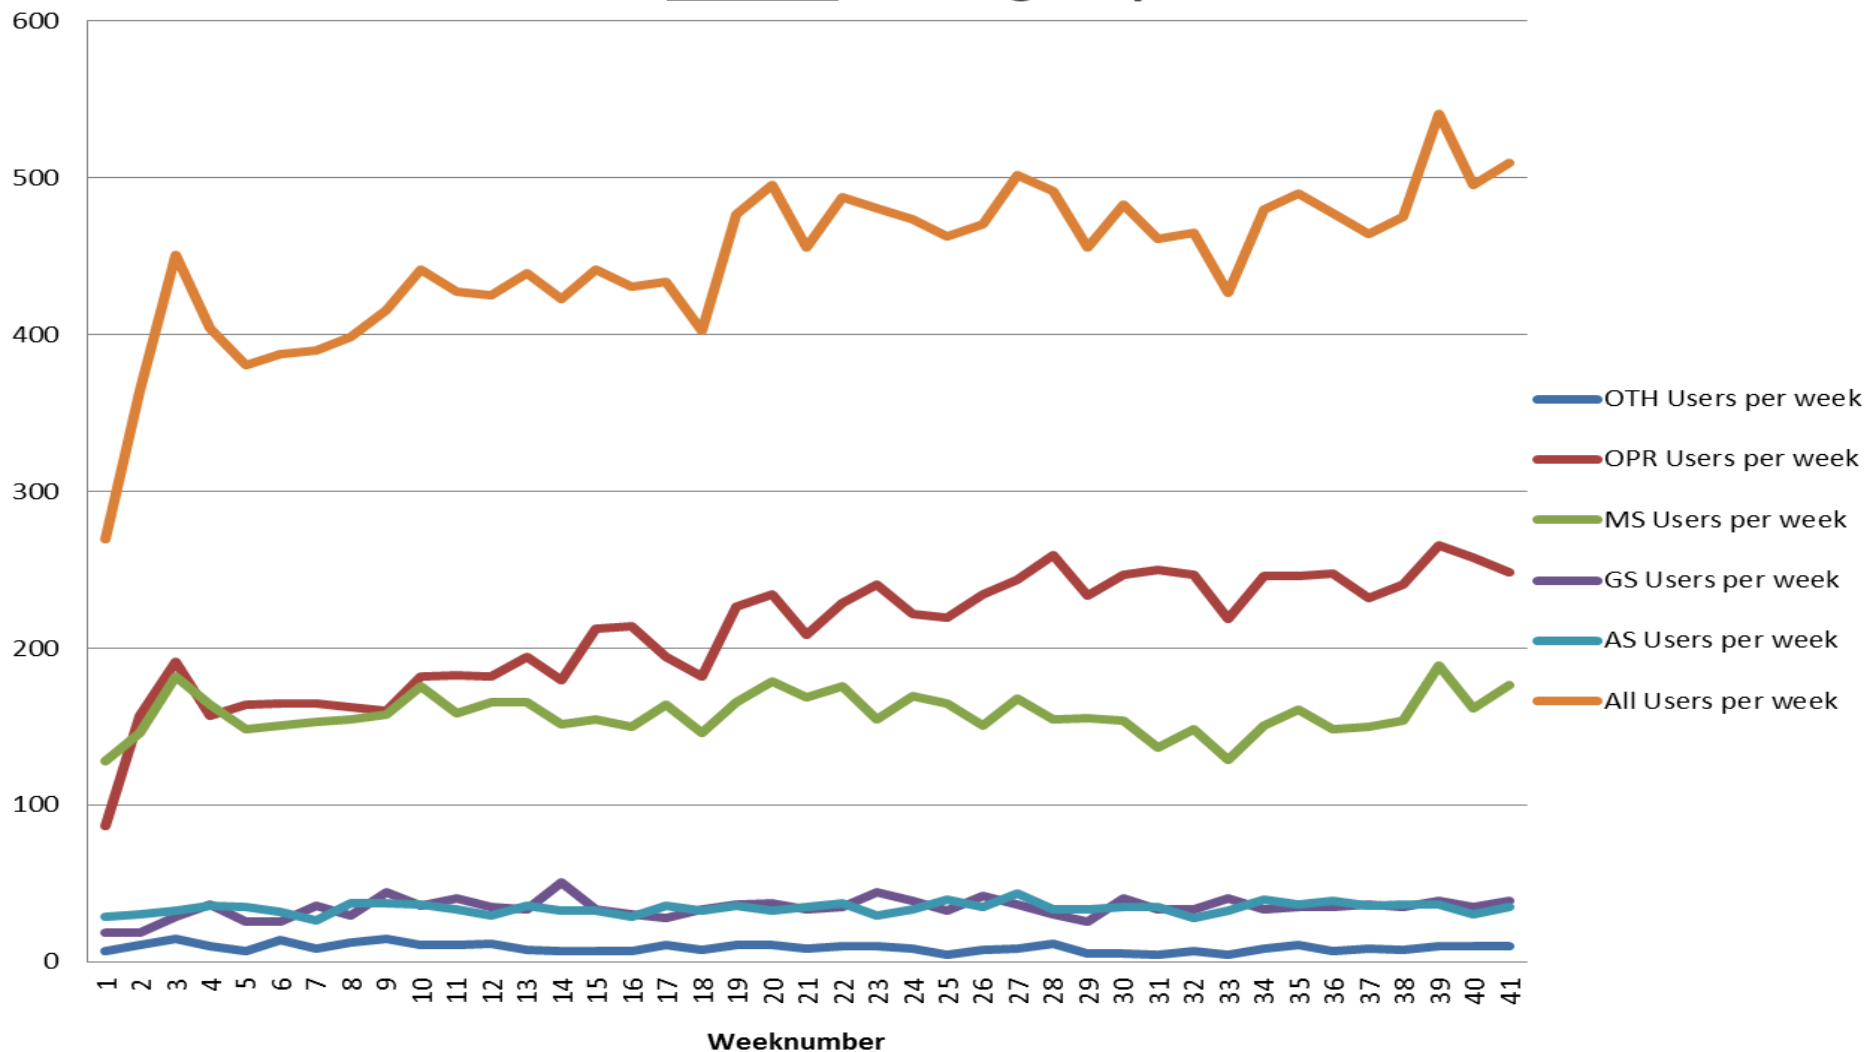

Automatic disabling V2.2

- Email receipt is periodically tested
 - Account is silently disabled 28 days since last test
 - User administration shows “disabled-auto”
 - Upon next logon, user is notified he/she is due for next Email test
1. Click link
 2. Enter Email address (known by DB)
 3. Click link in Email received in next minutes

Database usage

Nr of distinct user logons per week

Database users
